

Job Title: Software Engineer - Angular

Duration: 12 Months

Location: Remote-LATAM

Job Description:

We are seeking a dedicated and skilled Software Developer **with Angular Expertise** to join our dynamic team, who possesses a passion for solving problems and writing clean, efficient code. The ideal candidate will be able to devise simple and effective solutions to complex issues, and have a positive, can-do attitude that complements their exemplary communication skills.

Key Responsibilities:

- Develop high-quality, maintainable, and scalable code that adheres to best coding practices.
- Solve complex problems efficiently with well-structured and easy-to-maintain solutions.
- Communicate effectively with team members, stakeholders, and clients to ensure clear understanding of requirements and project progress.
- Design and implement responsive user interfaces that provide an optimal user experience across various devices and browsers.
- Write simple, effective **APIs** under supervision, ensuring functionality aligns with the specified requirements.
- Work independently with minimal supervision, taking initiative as a self-starter to meet project deadlines and objectives.
- Collaborate with the development team to ensure code quality, participating in code reviews and mentoring others to follow coding standards.

Technical Skills:

- Proficient in Angular 2+ and associated libraries such as NGRX (Redux).
- Strong understanding of front-end technologies, including HTML5 and CSS3.
- Experience with hybrid app development and knowledge of the Ionic Capacitor and Ionic UI framework is highly desirable.
- Ability to work on server-side programming with Typescript and Node.js.
- In-depth experience and knowledge of TypeScript and its application in developing components and directives using Angular.
- Familiarity with intermediate Angular concepts such as change detection, dependency injection (DI), and reactive forms.

Qualifications:

- Proven experience as a front-end developer with a portfolio or examples of past work and projects.

- Bachelor's degree in Computer Science, Information Technology, or a related field, or equivalent experience.
- Strong analytical and problem-solving skills.
